

## Capabilities

OneGlobe provides innovative software engineering, and IT consulting services to federal, state and local governments as well as commercial customers. We engage at all levels of the system development process from strategy to execution. We create solutions using modern approaches to development like agile, automation first and DevSecOps. The solutions we create include cloud based big data, analytics, mission focused and enterprise systems. We solve problems and deliver systems for mission success.

### Agile Software Development

We deliver value to our customers using proven agile techniques and methodologies. With a practical approach, we keep the focus on what really matters: collaboratively delivering high quality software that meets your needs. We have experience with several agile development styles including SAFe, Kanban, Scrum, DevSecOps, Lean, LESS and XP practices and can tailor our approach to meet your circumstances and agile maturity level. Quality is at the core of everything we do. We automate first and develop high quality amazing software that users love.

### Cloud Engineering & Architecture

We build systems that leverage today's scalable cloud platforms. Our architecture teams can help outline cloud strategies and plans to move even the most complex systems to cloud or hybrid platforms. OneGlobe has achieved Advanced Tier partner status in the AWS Partner Network and is a member of the AWS Public Sector Program.

### Data Engineering

We build secure and flexible big data platforms, analytics and visualization engines, and data distribution hubs that take the risk out of data management. We understand the risks and sensitivities that come along with handling our customers' data and ensure that security is considered from the start.

### Systems Integration

OneGlobe engineers implement software integrations across a variety of disciplines. Our experts deliver solutions that help our customers leverage the latest technology, packages, and platforms from COTS, GOTS, Open Source or custom including Enterprise and Mission focused systems.

## What sets us apart

- OneGlobe has fostered a culture of continuous learning within our organization so that our people have the skills required and we are able to provide customers with the best modern solutions available
- We provide full service IT solutions and have the skill to identify, plan and perform cost-saving steps throughout the system lifecycle to enhance system efficiency, while optimizing the value that we deliver to our customers.
- Our people. They have the drive and right mindset to feel ownership on the projects they work and partner with our customers to give the extra effort sometimes required to deliver success.

## Past Performance

- AWS Managed Services
- DevSecOps CI/CD Pipelines
- Data Analytics
- Grants Management
- Case Management
- Identity Management & Access Control
- Big Data
- Intelligence Lifecycle
- Immigration Processing
- Common Operation Picture
- Financial Management
